COURSEWINNER

THE PUNTERS COMPUTER PROGRAM

selec

SOFTWARE

COURSEWINNER

COURSEWINNER allows you to use the power of your computer to get the edge on the bookmaker.

The program contains a database full of detailed information on all English and Scottish courses (Flat or National Hunt). The ten leading trainers and jockeys, and effect of the draw for different going, weight carried and race length is detailed for each course. This information can be displayed on the screen for reference at any time.

COURSEWINNER can be used in two modes–quick mode requires only the starting price and results of recent outings (as found in any newspaper) for each runner. Extended mode allows detailed analysis of the following factors:

- Recent form and Starting Price
- Weight carried and Race length
- Trainer and Jockey form for the course
- Effect of the Draw and of the Going

COURSEWINNER automatically utilises these variables and calculates a profit factor for each runner. The best bet is given, together with any other runners which appear to offer a profit at the price.

Analysis normally requiring hours of cross referencing can be done in seconds. COURSEWINNER can help you maintain a steady profit throughout the season.

The package comes complete with program, database and detailed instruction booklet.
